

Proposed Chemical Use in Summer 2020/2021

The following coupes are being monitored for potential insect control in 2020/21 and therefore may have a chemical application between November 2020 and February 2021.

To easily view the location of these coupes, please use the interactive map viewer <https://www.sttas.com.au/forest-operations-management/interactive-map-viewer> and select from the menu for Potential Chemical Application Summer.
