

Tasforests

Volume 16, December 2005

Contents

	<i>page</i>
<i>Astacopsis gouldi</i> Clark: habitat characteristics and relative abundance of juveniles <i>P.E. Davies, L.S.J. Cook, S.A. Munks and J. Meggs</i>	1
An assessment of timber values from alternative silvicultural systems tested in wet <i>Eucalyptus obliqua</i> forest in Tasmania <i>U. Nyvold, J.K. Dawson and J.E. Hickey</i>	19
Fire-attributes categories, fire sensitivity, and flammability of Tasmanian vegetation <i>A.F. Pyrke and J.B. Marsden-Smedley</i>	35
The effect of three silvicultural treatments on eucalypt regeneration in dry, inland <i>Eucalyptus amygdalina</i> forest in the northern Midlands, Tasmania <i>C. Hawkins</i>	47
Natural and planted regeneration after harvesting of Huon pine (<i>Lagarostrobos franklinii</i>) at Traveller Creek, western Tasmania <i>S.M. Jennings, L.G. Edwards and J.E. Hickey</i>	61
Response of understorey floristics to pre-commercial thinning and fertilising in even-aged eucalypt regeneration <i>M.G. Neyland and A.V. LaSala</i>	71
Life-history studies and the impact of recent forest harvesting on two frog species, <i>Crinia signifera</i> and <i>Litoria ewingii</i> <i>B. Lauck</i>	83
A comparison of timber quality of blackwood grown in young swamp forest, fenced regeneration, and a plantation <i>G.J. Bradbury</i>	95
Wood-decay fungi and saproxylic beetles associated with living <i>Eucalyptus obliqua</i> trees: early results from studies at the Warra LTER Site, Tasmania <i>A.J.M. Hopkins, K.S. Harrison, S.J. Grove, T.J. Wardlaw and C.L. Mohammed</i>	111
A comparison of macrofungi in young silvicultural regeneration and mature forest at the Warra LTER Site in the southern forests of Tasmania <i>G.M. Gates, D.A. Ratkowsky and S.J. Grove</i>	127
An inventory of macrofungi observed in Tasmanian forests over a six-year period <i>D.A. Ratkowsky and G.M. Gates</i>	153
